The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/599,084	Applicant(s) KEALL ET AL.	
	Examiner Angela M. Hoffa	Art Unit 3768	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This office action is in response to communication filed on June 15, 2007.

Priority

2. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

Drawings

3. The drawings are objected to because shading in drawings is only permitted if it is necessary to illustrate the concept of invention. Since this does not appear to be the case, Figures 1, 6A-6B, and 7A-7E are objected to and require correction. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claim 10 is objected to because of the following informalities: Claim 10 does not include any further structure to limit the scope of invention since the claim is directed towards a system rather than a method. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S.

Patent No 6,690,965 to *Riazat et al.*

Riazat et al discloses a system and method for reducing motion artifacts and patient dose in radiological 4D CT imaging comprising:

-Measuring periodic motion of a lung tumor (Col. 1, Lines 57-58) using a respiratory signal (Fig. 2-3) to detect irregularities in its periodic motion using an

Art Unit: 3768

envelope technique (signal range 302, Fig. 3) , wherein the irregularities are representative of motion artifacts in the image (Col. 1, Lines 15-49; Col. 7, Lines 46-53).

Riazat et al further discloses many functionally equivalent means for measuring the respiratory signal including cameras, temperature sensors, strain gauges, spirometers, and pneumotactographs (Col. 1, Line 58-61, Col. 2, Lines 4, 42).

-Controlling a 4D CT scan of the lung anatomy so as to pause the scan during period having said detected irregularities ("beam hold" gating signal threshold 310, Fig. 3, Col. 5, Lines 38-55).

Riazat et al further discloses a computer (computer 110, Fig. 5a) as the means for carrying out the processing and recording steps.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Publication No. 2005/0113673 to *Avinash et al* discloses subject matter that reads on the claimed invention. U.S. Patent Nos. 7,191,100 and 6,959,266 to *Mostafavi* discloses subject matter that reads on the claimed invention. U.S. Patent No. 5,271,055 to *Hsieh et al* discloses subject matter that reads on the claimed invention.
